- Runtimes: NodeJS, .Net, Java JRE, LAMP, Browser/DOM
- Cloud services: Amazon Web Services, Microsoft Azure
- Networking: TCP/IP, HTTP, REST, GraphQL, SSL/TLS, DNS, FTP, email
- Databases: DynamoDB, MySQL, Aurora, MongoDB, SQL Server, Postgres
- Operating systems: Linux (Ubuntu, Debian), Microsoft Windows
- Methodologies: Agile, LEAN, RAD, waterfall, TDD, BDD
- Version control: git, svn
- DevOps: CI/CD, infrastructure-as-code
- Solutions: APIs, SaaS, web applications, websites, SPAs, mobile apps, web services, event-driven systems, libraries
- Roles: hands-on technical work, architecture, team leadership, business development, mentoring
- Business domains: military, retail, advertising, financial, scientific, environmental, mining
- Leadership: mentoring, presenting, meetup organisation, team management, recruitment

---

## Education & Certifications

- Bachelor of Science (Computer Science)  
Murdoch University
- Solutions Architect - Associate  
Amazon Web Services
- Professional Scrum Master PSM-I  
Scrum.org

## Community Involvement

- Organiser of Perth Serverless meetup
- Presenter, volunteer and attendee at software conferences including DDD Perth
- Volunteer at NodeGirls (Muses) Perth and other community mentoring events
- Top 10% contributor on Stack Overflow as at May 2019
- Contributor to open source software repositories on GitHub (profile ) and Gitlab (profile ).

## Current Role

### Senior Consultant @ Readify / Telstra Purple

Jan 2018 — present

NodeJS · TypeScript · JavaScript · C# · .NET · Web UI · GraphQL · Microsoft Azure · git · Agile · Scrum · DevOps · CI · CD

At Telstra Purple (formerly Readify), I lead teams to solve problems and deliver value to clients across a range of business domains, technologies and skill sets. The company has a strong history with Microsoft technology, and I was recruited in order to build an AWS capability within the Perth team to diversify their offering. I have been instrumental in this initiative through organising and facilitating group PD and training, and promoting AWS training and certification within the team.

---

## Previous Role

### Technical Lead @ Gaia Resources

Dec 2013 — Jan 2018

AWS · Serverless · NodeJS · JavaScript · TypeScript · Web UI · PHP · LAMP · git · Agile · Scrum · DevOps · CI

Gaia Resources is a consultancy specialising in biological and environmental science applications. I worked solo and leading teams to deliver a large range of projects, including collection management software, data analysis tools, and custom web applications for clients in this and related fields. I was also instrumental in converting the company from running its own servers to using cloud services almost exclusively, as well as introducing Scrum as a company standard, and initiating the creation of an -as-a-Service offering for collection management.
